REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The rejections of record are overcome by applicants' amendments and comments. The prior art neither teaches nor suggests the claimed process for producing the taxane derivative. The novelty resides in performing the cyclopropanation step in the presence of a sulfolane. See for example WO 95/20582 where the cyclopropanation is not performed using a sulfolane. Specifically examples 12 and 51, taken from chart 14 at page 155 and chart 31 at page 172 respectively which show a baccatin derivative being cyclopropanated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amelia A. Owens whose telephone number is 571-272-0690. The examiner can normally be reached on Monday - Friday from 8:30 - 5:00.
